

## Data Security Solutions

In many businesses the implementation of effective network and workstation security measures are overlooked, popular software is chosen without assessment and policies are poorly maintained. This can expose a business to risk.

IT security that works  
Don't be left in the dark

- **\$268,000 – The average cost of a data breach that exposes personal information and requires you to inform your customers – even if the lost data is never used.**
- **100% greater cost to respond to a security incident, than to implement preventative measures.**
- **93% of companies that lost their data center for 10 days or more due to a disaster filed for bankruptcy within one year of the disaster.**
- **50% of businesses that found themselves without data management for this same time period filed for bankruptcy immediately.**

At OPSEC a significant part of our success is built on our ever-increasing network of independent security consultants and our ability to team with highly competent experts. Through our affiliate, Monidax, we provide technical support to augment our security and risk management services.

Monidax can support your organization with the following Data Security Solutions:

- **Data Security**
- **Antivirus Recommendations**
- **Network And PC Security**
- **Firewall Recommendations**
- **Vulnerability Assessments**
- **Implementation Of Best Practices**
- **Standards Alignment**
- **Remote Security Management**

OPSEC is a professional information security consulting firm, established in 2000 by a group of senior security managers and government consultants who pride themselves on their integrity, ability and attention to detail.

OPSEC staff have extensive security experience with Government and Corporate agencies; helping to protect some of the most critical facilities and information resources in Canada. Our information security services include:

### Risk Management

- Threat and Risk Assessment
- Compliance Audit and Vulnerability Analysis
- Policy, Standards and Training
- Disaster Recovery and Business Continuity Planning

### Network Security

- Solution Design and Implementation
- Security Management and Support
- Penetration and Vulnerability Testing
- Open Source Intelligence Analysis

### E-Evidence & Forensics

- Electronic Evidence Support
- Digital Forensics
- Password & Data Recovery
- Internet Analysis

Let OPSEC provide you with the same level of service that was once only available to the Federal Government or large Corporations; our expertise assists you in managing your risk and reducing the negative impacts to your business in a cost-effective manner. We offer our clients the highest levels of security expertise and provide them with timely and reliable information to support effective business decisions.

With our proven approach we can offer you security management and electronic evidence solutions that are innovative, responsive, cost sensitive and timely to meet your requirements. When choosing to manage your company's risk, be pro-active, choose OPSEC.

- Training

Every year businesses suffer significant economic loss from a variety of threats including criminals, hackers, disgruntled employees, theft or loss of information and environmental hazards. Many of our clients did not realize their level of vulnerability until an unfortunate incident occurred; and often they have a limited ability to assess their risk level, and don't possess the internal capability to implement the processes for protecting against such threats.

With our proven approach we can offer you security management solutions that are innovative, responsive, cost sensitive and timely to meet your security requirements.

## Chance favours the prepared mind
